Ms Abby Tan

Head of Human Resource Department

Grab APAC Campus

88 Seletar Gateway, 09-01 Singapore 548888

RE: Application for Cybersecurity Analyst (Job Reference No. 50003)

Dear Ms Tan,

I am writing to express my strong interest in the Cybersecurity Analyst position at Grab. As a final-year Information Technology student at Nanyang Polytechnic specializing in cybersecurity and an AISP Silver Medallist, I am eager to apply my technical rigour to protect Grab's digital assets and support its mission of driving Southeast Asia forward.

My suitability for this role is built on a foundation of both academic excellence and hands-on technical application. During my recent Web Development Project, I was responsible for the security architecture of an AI-integrated business application. By implementing secure session management and robust input validation using Python Flask, I ensured the application met high industry standards for data integrity. This experience taught me how to bridge the gap between "building features" and "building secure features," a mindset I know is critical for a fast-paced environment like Grab.

Furthermore, my Certified Secure Computer User (CSCU) certification and my participation in the **National Junior** Cybersecurity Olympiad have sharpened my skills in threat triaging and vulnerability assessment. I am proficient in using tools like Cisco Packet Tracer for network troubleshooting and have a deep understanding of the PDPA concepts necessary for handling Grab's sensitive user data with honour and humility.

I am a proactive team player who thrives on solving ambiguous technical challenges. My digital portfolio, which can be accessed via the link in my resume.

Thank you for your time and consideration. I look forward to the possibility of discussing how my technical strengths and commitment to security can contribute to the Grab team.

Yours sincerely,

Dillon Poh Zhi Xiang

SUMMARY

Diploma in Information Technology student with hands-on experience in network engineering, web development, and cybersecurity. Proficient in Python programming, UI/UX design, and full-stack development using Flask and SQLAlchemy. Demonstrated ability to collaborate in team environments and deliver integrated technical solutions. Seeking opportunities to apply technical skills in IT infrastructure or software development roles.

EDUCATION

Diploma in Information Technology | Nanyang Polytechnic | Current

Relevant Coursework & Projects:

- Network Technology: Configured and troubleshooted network topologies using Cisco Packet Tracer (implemented routing protocols and VLAN configurations)
- Web Development: Developed integrated web applications using Flask, Jinja templating, SQLAlchemy, and OOP principles I collaborated with 5-person team to deliver full-stack projects
- Programming (Python): Built applications utilizing data structures (lists, tuples, dictionaries), control flow (loops), functions, modules, and file handling
- UI/UX Design: Created responsive web interfaces using Bootstrap, CSS, and JavaScript; designed user-centred prototypes in Figma following full design thinking process from user empathy mapping to final interactive prototypes
- Business Innovation & Enterprise: Developed wireframes to high-fidelity prototypes using Figma also conducted user research and usability testing to validate design decisions

Higher Nitec in Cyber and Network Security | Institute of Technology | 2023 - 2025

- Deployed and managed Windows Server environments and Linux distributions using VMware virtualization
- Gained practical experience in network security protocols and system administration

TECHNICAL SKILLS

Programming & Development: Python (OOP, Flask, SQLAlchemy), HTML, CSS, JavaScript, Bootstrap, Jinja

Networking & Security: Cisco Packet Tracer, VMware, Linux, Network Troubleshooting, Burp Suite, Wireshark, Nmap, Virus Total, FortiGate

Design & Tools: Figma (Wireframing, Prototyping), UI/UX Design, User Research

Soft Skills: Problem-solving, Team Collaboration, Adaptability, Time Management, Creative Thinking

WORK EXPERIENCE

Network Engineer | Remora Network Solution | April 2024 - August 2024 | Singapore

- Configured and maintained multi-vendor network equipment including routers and switches from various manufacturers
- Interpreted and implemented network diagrams ranging from intermediate to enterprise-level architectures
- Executed diagnostic commands for network troubleshooting and performance optimization
- Supported infrastructure deployment and documentation of network configurations

EXTRACURRICULAR ACTIVITIES

ACE Club – Events Chairman

- Led team of peers in organizing campus-wide events and initiatives
- Participated in Youth Expedition Project (YEP) in Sabah, Malaysia, contributing to UN Sustainable Development Goals including clean water access, poverty alleviation, quality education, and infrastructure development

Student Volunteering Club – Volunteer

- Assisted in organizing birthday celebrations for elderly residents at senior care facilities
- Supported Rummikub competition logistics including participant registration, wayfinding assistance, and event coordination

Cybersecurity Club – Member

- While participating in the Cybersecurity Club, I learnt with identifying vulnerabilities in a mock enterprise network. I performed vulnerability assessments using Nmap and Burp Suite to identify weak encryption protocols. This resulted in a 40% improvement in the team's detection speed during the internal CTF competition."
-

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- **Certified Secure Computer User (CSCU) – EC-Council**
- **AISP Silver Medallist**
- **AWS Cloud Practitioner (In Progress)**
- **Competitions & Achievements:**
- **National Junior Cybersecurity Olympiad 2024 (Participant)**
- **StandCon CTF**
- **Mission X**
- **HackBash x A. YCEP 2024**
- **Ai for Youth Program 2024**

Community Service:

- **Overseas Service & Development Programme (Youth Expedition Project)**
 - **MOE adopt a block**
 - **IgnITE Skills**
 - **Rummikub Competition**
 - **Mission X**
 - **CSCU Tutoring**
-
